

TAXPAYERS
PROTECTION
ALLIANCE

December 2, 2015

Dear Representative:

The Taxpayers Protection Alliance (TPA), representing millions of taxpayers across the country, writes in support of **H.R. 8, the North American Energy Security and Infrastructure Act**. This legislation would fast track the approval process for LNG exports, facilitate national energy security corridors (e.g., pipelines) on federal lands, and make necessary improvements that will help to protect the grid. All of these will be beneficial to taxpayers and the economy.

America's energy sector is one of the key drivers of the economy, and as such, it is important that this legislation passes Congress so that the industry will continue to create jobs and encourage overall economic growth.

TPA urges all members of the House to support **H.R. 8**, so that the United States can continue to encourage innovation and growth in our energy sector, while making sure to protect all Americans with improvements to critical energy infrastructure.

Regards,

David Williams
President
